GATE SYLLABUS FOR DSA

Programming and data structures

- programming basics: programming, Inc, variable, control flow, functions, recursion

- linear data structures: Arrays, strings, stacks, queues, linked lists

- Trees: (General) trees, binary, b+ tree

- Heaps: Binary heaps, priority queues, basic he.

Algorithms

- Search: linear & Binary

- Sort: basic - Bubble, selection.

- Algorithms design techniques: Greedy & Dynamic

Programming: divide and conquer

5. Find out set of inputs & outputs of the following.

1. Electricity Bill:

Inputs

Outputs

units consumed

Total Bill

Date for payment

late payment penalty

2. Bus ticket

Inputs

- present station
- destination station
- no. of passengers
- Bus type

Outputs

- Ticket number
- Seat number
- fare amount
- Departure time
- Destination point
- Total amount to paid

Input

- Sender's name/number
- Message content
- Time stamp

Output

- Delivered message
- Delivery status
- Time stamp of delivery

4 The Real-life examples of DSA

- Queue - students are waiting at canteen counter
- Stack - Books piled on your desk
- Array - houses & shops in a row.
- linked - chain of people walking single file.
- Tree - hierarchy in my college
- 2D array / Matrix - college timetable.
