

TASK-1

Identify list of variable and their datatypes for the following. 1 Bill of amazon order.
train, bus ticket, current bill, Gas bill

Variable Datatype

order number → long long int

order data → string

Invoice number → string

customer name → string

Seller name → string

Product name → string

quantity → int

unit price → double

tax Rate → int

tax amount → double

gst no → string

net amount → float

Payment transaction → string

Date → string

2. A train ticket or Bus ticket

Variable Datatype

ticket no → long int

data → string

time → string

depart → string

route → string

from place → string

to place → String
Passengers → int
fare → float
total amount → float
balance → float

3. current bill

Variable Datatype

Bill no. → long

Service connection
no → String

unique scno → long

QR code → image

consumer name → String

Address → String

Category → int

Energy charge → float

customer charge → float

ED → float

Surcharge → float

APPR charge → float

Government subsidy → float

Bill Amount → float

Net bill → float

Due date → String

Bill time → String

District → String

Q. Gas Bill

Variable

Datatype

Consumer no → long long int

customer name → string

Cylinder price → float / double

gst → float / double

sgst → float / double

final price → float / double

order status → string

connection type → string.
